

Bug Report for Team 16

<https://github.com/BrianNguyen0116/EECS3311SM-T15/issues/2#issue-1628477855>

Date Reported: March 16, 2023

Status - Open

Release number: Release 1, Iteration 2

Resolution: TODO: For Dev

Version identifier: Main Branch

Resolved by: TODO: For Dev

Configurations: SW

Report Type: Design Issue

Can Reproduce: Yes

Severity: Medium

Priority: TODO: For Dev to determine

User clears their pizza selection after ordering and adds pizza with multiple toppings and sees null value.

Problem description and how to reproduce it:

1. Log in test or as admin
2. Select any size, dough, sauce options
3. Select one or more toppings and submit the order
4. Clear the order and now select any size, dough, sauce options
5. Select any number of toppings (0 or more) and the number of toppings you had selected in step 3 are the number of null fields that follow/are listed out following the current number of toppings you have selected.

For ex: before I selected 1 topping, and now cleared the order and have now selected one new or same topping, and am left reading in the screen [current topping, null].

Video attached as well.

Note: This issue does not happen for Sauce.

Suggested fix: To check for null fields and to prevent displaying them to the user.
